## 3.S2 React!

Start Assignment

Due Thursday by 2pm Points 3 Submitting a website url
---

Create a portfolio home page using the React framework. Goal is to get experience using React; what you make & how it looks doesn't really matter for this exercise. (That said, if you're inspired, go for it!) To get set up:

- 1) Install Node and NPM (<u>Download Node.js (LTS</u>) ⇒). Node is the environment that React lives on top of.
- 2) Install VS Code (so that you can write and edit stuff). <a href="https://code.visualstudio.com/download">https://code.visualstudio.com/download</a> []

(Any editor will work. Michael recommends VS Code and others agree.)

- 3) Create a new React app. In a Terminal window, type: npx create-react-app my-app
- 4) Here's a good tutorial to get started → with React.

You are welcome to work alongside other students. For this exercise, it is important that you type all of your work yourself so you learn how React works.

Some Rubric (2)						
Criteria	Ratings				Pts	
React	3 pts Interactive	2 pts Static	1 pts Link doesn't work e.g., Localhost. Make sure to upload.	0 pts No submission	3 pts	
Total Points: 3
